My first step is to locate the user

WMI Filter
None

This user is appart of the HR orginizational Unit

Now I need to reset their password by clicking "reset password"

Here I assign a temporary new password

Reset Password

New password:

Confirm password:

☐ User must change password at next logon

The user must logoff and then logon again for the change to take effect.

Account Lockout Status on this Domain Controller: Locked out

☒ Unlock the user's account

OK Cancel

We don't want user to have the temporary password indefinitely

We make sure the user needs to change password at next login

Now user has successfully been prompted to change password

bsmall's

The user's password must be changed before signing in.

OK

Cancel

Here I attempted to reuse old password

The group policy configured successfully blocked this from happening

bsmallis

(GP setup in my other repository, check it out!!)

Unable to update the password. The value provided for the new password does not meet the length, complexity, or history requirements of the domain.

OK

bsmall's

Your password has been changed.

OK

After creating a new password that fits the requirements

User is now able to login
